SOFTWARE and WEB DEVELOPER

Driven career-changer with a strong foundation in construction management and mechanical fitting, now transitioning into a career as a Junior Software Developer. Recently completed an intensive software engineering bootcamp, gaining hands-on experience in multiple coding languages and modern technologies. Bringing a diverse skill set, including leadership, problem-solving, and attention to detail, to contribute meaningfully to innovative software development projects.

TECHNICAL SKILLS

Python, Vue.js, CSS, HTML, Bootstrap, Django, GitHub, Golang, SOLID principles, OOP, and much more to come.

SOFT SKILLS

Teamwork, Problem-Solving, Resourcefulness, Openness to Feedback, Self-Motivation, Networking, Docker React Native, Git, JavaScript, APIs and SQL.

EXPERIENCE

HyperionDev, Software Engineering Bootcamp (Jan 2025 - Apr 2025)

- Hands-on learning approach to programming and software development through real-world practical activities.
- Achieved an overall average of 96% for bootcamp tasks.
- Grasped Python programming within three months, significantly enhancing coding skills and efficiency in data manipulation and analysis.
- Successfully completed five practical, real-world projects.

Udemy, Complete Full-stack WEB development (May 2025 - Ongoing)

- This is a comprehensive crash course enabling a full overhaul as a web development.
- Gaining valuable insight needed for full-stack.

Toyota, Mechanical Fitter (Mar 2023 - Nov 2024)

- Extensive experience in automotive maintenance and quality assurance. Developed a keen eye for detail and precision during pre-inspection processes, ensuring vehicles met safety standards and quality expectations.
- Proven ability to deliver fast and reliable work with minimal errors, demonstrating strong problem-solving skills and efficiency under tight deadlines.

- Gained valuable expertise in mechanical systems, customer satisfaction, and workflow optimization.

Oxford, Construction Manager (Mar 2019 – Nov 2021)

- Managed and oversaw multiple construction sites simultaneously, leading small teams and consistently delivered projects.
- Cultivated strong client relationships.
- Expertise in project planning, including meticulous task scheduling, proactive challenge anticipation, and consistent deadline adherence.
- Optimized on-site resource management, ensuring timely availability of all necessary materials.

PROJECTS

- [Finance calculator](#): A complete Finance calculator built with Python
- [Personal page](#): A personal touch made with Vue.js
- [E-bookstore](#): CRUD with SQL
- [Random band site](#): A fun project with Django
- [Complete Full-stack Web Development Course](#): In depth course covering multiple facets of web development

EDUCATION

HyperionDev – Software Engineering Bootcamp (Jan 2024 – Apr 2025)

High School – National Senior certificate (Jan 2006 – Dec 2018)

ACCOMPLISHMENTS

- Professional Growth: Progressing from an Intern Developer to a higher role in web and software development
- Skill Mastery: Developing expertise in multiple technologies, frameworks, and programming languages
- Building a Portfolio: Successfully completing and showcasing a series of diverse, high-quality projects that highlight my creativity, technical skills, and ability to solve real-world problems.
